

Nathan Tsai

Software Engineer | Hackathon Enthusiast

EDUCATION

University of California, Los Angeles | Computer Science

EXPECTED GRADUATION: JUNE 2019

- Major GPA: 3.8

EXPERIENCE

Software Engineer Intern | Qualtrics

JUNE 2018 – SEPTEMBER 2018

- Developed Angular modules for preconfiguring templates of data visualization widgets
- Constructed a dependency tree to efficiently inject customer data into generic templates
- Unit tested Angular components with Mocha and Sinon to achieve 100% test coverage

Software Engineer Intern | Novacoast

APRIL 2017 – JUNE 2018

- Built a REST API with Go that queries 2,500+ customer contracts stored in MongoDB
- Automated customer acquisition processes by integrating with Box and DocuSign APIs
- Deployed Docker containers to facilitate communication between server and client code

Web Developer | Daily Bruin

SEPTEMBER 2016 – APRIL 2017

- Transformed research and journalism into informative pages viewed by thousands/day
- Designed interactive map elements to allow users to virtually explore UCLA's campus
- Implemented lazy loading techniques to dynamically call APIs when data is requested

PROJECTS

Pocket Change | Personal Finance App [iOS]

<https://github.com/nwtsai/PocketChange>

- Constructed an iOS app with Swift and the Core Data framework that allows a user to analyze their personal spending habits by observing trends with charts, graphs, and maps
- Designed animated pie charts and bar graphs that plot transaction data for each budget over various time intervals, beautifully visualizing a user's spending history over time
- Utilized regular expressions for data validation by dynamically enabling or disabling buttons and limiting text field inputs to ensure data integrity, validity, and legitimacy

MarkItPlace | E-Commerce Platform [Web]

<https://github.com/nwtsai/MarkItPlace>

- Created a full-stack web application with JavaScript and Amazon AWS, providing an online platform for users to buy, sell, and search for items by interacting with a live map
- Devised filtering algorithms that allow users to find items by key word, category, price range, and location, displaying only the markers on the map that match the search criteria

DataQuake | Live Earthquake Data [Web]

<https://github.com/nwtsai/DataQuake>

- Designed a web application with JavaScript and Node that maps the location of earthquakes around the world, rendering circles with radii that correspond to their respective magnitudes
- Implemented a search bar that parses through real-time earthquake data, plotting only the earthquakes at the specified location, magnitude range, or time frame on an interactive map

SKILLS

Programming Languages

C++, JavaScript, python, Golang, Swift, Java, C, Bash

Relevant Coursework

CS 180 | Algorithms and Complexity
CS 152 | Design of Digital Systems
CS 146 | Machine Learning
CS 130 | Software Engineering
CS 117 | Computer Networks
CS 111 | Operating System Principles

Platforms

Docker, Github, Gitlab, Box, DocuSign, Salesforce, Solidworks

Libraries | Frameworks

Angular, React, Node, Lodash, jQuery, WebGL, Handlebars, Bootstrap, Materialize

Markup Languages

XML, HTML

IDEs

Sublime, XCode, Android Studio, Microsoft Visual Studio, Eclipse

Languages

English [native], Mandarin [fluent]

AWARDS

Dean's Honor List

Scholastic distinction granted to UCLA engineering students who obtain a GPA of 3.7 or above

- Winter 2017
- Spring 2017
- Fall 2017
- Winter 2018
- Spring 2018

AP Scholar with Honor

Granted to students who receive an average score of at least 3.25 on all AP exams taken, and scores of 3 or higher on four or more of these exams

Community Service Award

Awarded to students who have given at least 300 hours back to the community through volunteer work
